

# Description of Data in SRC2006.mdb

This document describes the data tables contained in SRC2006.mdb. Most of the material should be familiar to those who have worked with the New York State School Report Card data sets in past years. There are, however, a few notable differences in 2006, namely:

- New statewide testing program went into effect for Grades 3-8 in ELA and Mathematics; these data are not directly comparable with prior years' assessment aggregations.
- High School achievement results in ELA and Mathematics based on Accountability Cohort membership and reported in the Overview and Analysis report cards in prior years have been replaced by Total Cohort aggregations.

The tables included in this download are shipped with no indexes to economize on file space and download time. You will probably want to create indexes on BEDS\_CD and other key fields to improve your local query performance.

## Data from Accountability and Overview Report (AOR)

This section describes the tables and columns in which data about performance of designated subgroups is reported by public school, public school district, district Needs-to-Resource-Capacity (N/RC) group, similar schools group, county, and as a statewide total public number. Please use this document to locate desired information in the tables of the same name in the School Report Card Database (SRC2006.mdb). In some cases, values may be stored as text items of length 255. This is an Access artifact. The content is of much shorter, but varying length, and usually formatted for presentation. If computations are to be performed with these numbers, please use the Val() function in any Access expressions to convert to a numeric data type. To ensure student confidentiality, the Department does not publish data for groups with fewer than five students or data that would allow readers to easily determine the performance of a group with fewer than five students. An (s) indicates that data for a group of students has been suppressed. If a group has fewer than five students, data for that group and the next smallest group(s) are suppressed to protect the privacy of individual students.

## Data from Comprehensive Information Report (CIR)

This section provides a brief description of the tables in the SRC2006.mdb database containing data displayed on the Comprehensive Information Report (CIR).

In some cases values may be stored as text items of length 255. This is an Access artifact. The content is of much shorter, but varying length, and usually formatted for presentation. If computations are to be performed with these numbers, please use the Val() function in any Access expressions to convert to a numeric data type. To ensure student confidentiality, the Department does *not* publish data for groups with fewer than five students or data that would allow readers to easily determine the performance of a group with fewer than five students. An (s) indicates that data for a group of students has been suppressed. If a group has fewer than five students, data for that group and the next smallest group(s) are suppressed to protect the privacy of individual students.
